PROFILE

Computer Science and Engineering student with an interest in web development and software development. Experienced in building academic projects using modern web technologies and databases. Eager to improve programming and problem-solving skills while gaining practical experience.

PROJECTS

FitLog - Workout Library & Tracker

- Developed a fitness web app using Next.js, React, and Tailwind CSS with exercise discovery and workout tracking features.

Hostel Management System

- Developed a hostel management system using HTML, CSS, PHP, and MySQL for student records and room management.

Edu Ecosystem

- Designed an academic software project to improve communication and information sharing among teachers, students, and parents.

SafeStep - Smart Assistive Stick

- Proposed an Arduino-based smart stick with obstacle and water detection features for visually impaired individuals.
